

THE FULL WORKFLOW, IN EVERY PLAN

One recruiting workflow. Choose the capacity your team needs.

Mira finds candidates, follows up after you approve each message, checks interest, and books interviews. You set the hiring criteria and decide whom to hire.

01 · LET AN AI AGENT RUN THE SEARCH

One Agent, one hiring workflow
Start an Agent for a job. Its work from sourcing through interview booking, including its contact unlocks and Deep Search, uses **0 Credits once active**. Your team approves every message.

02 · SEARCH THE PLATFORM YOURSELF

Credits for standalone actions
Searching is free. Unlock a contact: **10 Credits**. Run a Deep Search that returns candidates: **100 Credits**. Activate an Agent above your allowance: **3,000 Credits**.

Four plans. The same Agent capabilities.

WANT US TO RUN THE SEARCH?

Delivery service

A Metix delivery lead runs the day-to-day search on the platform. You set the brief and make hiring decisions. Purchased separately after scoping; the Scale success lead helps you use the product and is not Delivery service.

How monthly allowances work. Agents count new starts each month, not simultaneous jobs. Existing Agents keep running; closing one does not return its allowance. Unused Credits and Agent allowances do not roll over. Annual plans also issue and expire allowances monthly.

NEED MORE CAPACITY OR A CONTRACT?

Enterprise arrangements

Bring your hiring volume, team needs and procurement requirements. We agree the capacity, service scope and commercial terms in a written Order under the Metix AI Agent Services Agreement.

How billing works. A fixed subscription, with no placement fee. The subscription still bills if no candidate meets your criteria. Cancellation and plan changes take effect at the end of the current billing cycle; no prorated refunds or adjustments.
